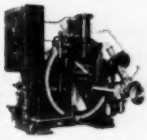
a complete line of *Continuous* CENTRIFUGES

SUPER CENTRIFUGE

High centrifugal force, continuous centrifuge. Tubular Bowl. An extremely efficient separator and clarifier.



D-2 CENTRIFUGE

Disc type continuous centrifuge. High throughput capacity.

SUPER-D-HYDRATOR

Recovers crystalline solids from liquids. handles slurries with 15 to 60% solids.

NOZLJECTOR

Disc type. Clarifier or Separator with continuous solids discharge.

SUPER-D-CANTER

Removes solids from liquids... Clarifies liquids... Classifies solids.

DV-2 CENTRIFUGE

Clarifier or Separator. Handles solids ranging from fine to slimes and sludges... with continuous solids discharge.

IT'S DIFFERENT and more EFFICIENT

AERODYNE

Mechanical Dust Collector

Illustrated is the Conical Filter Element employed in the Aerodyne Collector.

- This unit is the most efficient mechanical Dust Collector in existence today. Substantiating test data available on request.
- Low pressure Drop affords greater economy.
- Mechanical Simplicity through engineered design.
- Low Maintenance Cost assured through the new aerodynamic principle.
- Each installation is individually engineered and performance guaranteed.
- Consult one of our representatives or write for our new Aerodyne Collector bulletin.

MERCOID

AUTOMATIC CONTROLS FOR HEATING, AIR CONDITIONING, REFRIGERATION AND VARIOUS INDUSTRIAL APPLICATIONS

THE ONLY 100% MERCURY SWITCH EQUIPPED CONTROLS

The distinguishing feature of Mercoid Controls is the exclusive use of Mercoid hermetically, sealed mercury switches. These switches are not subject to dust, dirt or corrosion, thereby assuring better performance and longer control life. The items shown below are but a few miscellaneous items. See Catalog No. 700 for the complete line.

Pressure Controls

Temperature Controls

Float Operated Controls

Transformer Relays

Low Voltage Thermostats

Line Voltage Thermostats

Liquid Level Control

Oil Burner Safety and Ignition Controls

If you have a control problem involving the automatic control of pressure, temperature, liquid level, mechanical operations, etc., it will pay you to consult Mercoid's engineering staff—always at your service.

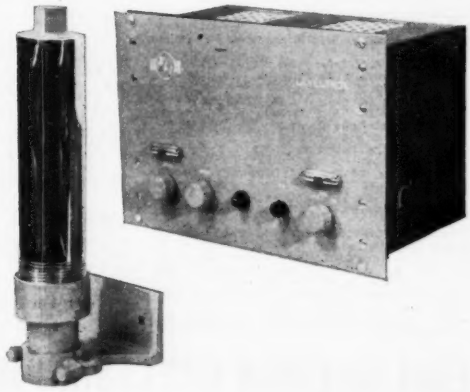
THE PENETRON

The PENETRON is an industrial Radiation instrument designed for the many problems of wall thickness measurements previously considered difficult or even impossible.

It uses the tremendous penetrating power of primary or secondary gamma radiations to measure non-destructively, and from one side only, the wall thickness of pressure vessels or piping.



In the past, inspection of pressure vessel and piping installations necessitated the shutting down of the equipment, the release of pressure, and the drilling of the containers at intervals for mechanical calipering. The PENETRON makes these measurements over the entire vessel, if desired, with none of the time-consuming, costly drilling and plugging operations. The PENETRON gauges thickness of materials faster than any other method available.

The PENETRON is furnished with two types of gauging heads—the Standard Head and the Tangential Head. In general, the Standard Head is intended for measuring large, flat or slightly curved plates and the Tangential Head is designed for wall measurements of tubular materials. The Standard Head, when used with a pipe adapter, may be used for wall thickness measurements of pipes where only the inside of the pipe is accessible—such as in the case of boiler tubes.

The action of the PENETRON does not depend upon the molecular structure or the physical state of the material being measured but rather upon the density and the thickness which allows accuracy of measurement better than 3%

LEVELTRON

THE DEVICE FOR MEASURING AND CONTROLLING LIQUID LEVEL UTILIZING THE TREMENDOUS PENETRATING POWER OF GAMMA RADIATION

The LEVELTRON is an industrial radiation instrument designed for the many problems of liquid level determination or control, wherein the conventional float or gauge method is impractical or unreliable. The fluid level within the vessel is determined as a function of the measurable gamma ray radiation at the outside of the vessel from a source of radiation located within the fluid within the vessel.

The LEVELTRON method of level gauging eliminates all mechanical or electrical connections through the vessel walls, thus eliminating potential sources of leakage or electric discharge.

It is constructed of two units; an explosion-proof detector head for installation on the tank, and the remote control unit which is normally installed in the control house. All operating controls are conveniently installed on the control units eliminating any need for adjustments at the tank unit.

Two types of LEVELTRON installations are available; one for use where the level must be held to a predetermined level or within very narrow limits. The other is used when it is desirable to continuously record fluid level over a wide level variation or to control the fluid at any particular level. The third type is designed for an "on - off" type with an explosion-proof detector unit for installation on the vessel and a remote control unit, which is normally installed at some distance from the vessel.

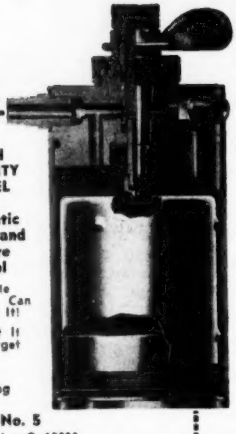
For The Most Effective

Automatic

VACUUM and PRESSURE CONTROL

LABORATORY MODEL for automatic vacuum and pressure control



- Maintains vacuum setting even after shutting down system.
- Operation is simple and fool proof.
- High Sensitivity.

MODEL No. 6

G 15074 Cartesian Manostat No. 6, stainless steel or with clear plastic (Tenite II) body tube, delivered with mercury and directions for use.

ea. $41.25

For Complete Informati on write for Bulletin CM 97.

HIGH CAPACITY MODEL for automatic vacuum and pressure control

- So simple Anyone Can Operate It!
- Just Set It and Forget It!
- Slashes Operating Costs!

MODEL No. 5

Catalog No. G 15080 (Pat. No. 2,482,167) Complete with 3 interchangeable orifices and mercury, $95.00. Size: 7½" overall, Diameter: 3¼". Weight: approx. 8 lbs.

For Complete Information write for Bulletin ICM-96.

Hackney

COMPRESSED GAS CYLINDERS

Hackney Compressed Gas Cylinders are designed with the shipper's needs in mind. They're light, strong, easy to handle and ruggedly built to withstand shipping and handling abuse. These advantages reflect themselves in *lower transportation costs* and full protection for the product.

Hackney Compressed Gas Cylinders are widely used by shippers of Acetylene, Ammonia, Chlorine, Liquefied Petroleum Gases, Oxygen, Carbon Dioxide, Methyl Chloride, Cyclopropane, Freon, etc. They are entirely seamless or of two-piece construction, meeting all ICC specifications. Write for full details.

Hackney

2-PIECE ACID DRUMS

Hackney Acid Drums are deep drawn . . . pressed from two sheets of steel. That means no longitudinal or chime seams . . . just one circumferential weld located between and protected by two I-bar rolling hoops. That's why the interiors are smooth, free of cracks and crevices. Heavy forged spuds, attached by a two-pass weld, minimize bung failures. Reinforced chime protectors add strength and life. Heat treating increases finished drum's resistance to corrosion.

Shippers of acids and alkalies everywhere find that Hackney 2-piece acid drums effectively reduce costs . . . last longer. Write for complete information.

FIBRE DRUMS

FOR DRY BULK PRODUCTS

STAPAK

Stapak drums are ideal low cost containers for many dry products. Made with convenient full open top for rapid filling and easy dispensing. Stapak drums are sturdy in construction and comply fully with requirements of Consolidated Freight Classification regulations. Also comply with all pure food laws and are ideal for food products and chemicals. Sizes range from 2 to 35 gals. Acceptable weights to 200 lbs.

FIBERPAK

Fiberpak drums have the same sturdy construction as Stapak but are designed for heavy duty service. Bursting tests range from 950 to 1850 and more pounds per square inch. Also comply with Interstate Commerce Commission regulations covering class "B" (ICC-21A) poisons, and other dangerous commodities. Sizes range from ¾ to 67 gals. Acceptable weights to 400 lbs.

LEVERPAK

Leverpak drums have the advantages of Stapak and Fiberpak. Outstanding characteristics are their light tare weight, freedom from contamination, sift proof seal, pilfer proof locking band closure. Interior and exterior treatments or linings can be made to meet your special requirements. They also comply with I. C. C. regulations for class "B" poisons.

Sizes range—12 to 75 gals. Acceptable weights to 400 lbs. All carriers assume the same responsibility for merchandise packed and shipped in Stapak, Fiberpak and Leverpak as in wood or steel of like capacity.

Write for information covering these shipping drums.

BUFLOVAK Vacuum Double Drum Dryers safely dry a wide range of heat-sensitive materials at protective low temperatures.

BUFLOVAK DRUM DRYERS

DRUM DRYING is an economical and continuous method for producing dry materials at low operating cost, directly from liquids containing solids in solution or suspension. This modern process is applicable to a wide variety of materials, including chemicals, dyes, pharmaceuticals and food products. It offers the added advantage of controlling, within certain limitations, the physical characteristics, appearance and texture of the dry product, demanded by market or process requirements.

The process of drum drying consists of applying the liquid material to a revolving heated drum, where the moisture is quickly evaporated, during a partial revolution of the drum. Then the dry material is removed by a stationary knife. This basic operating principle is used with various modifications on all types of BUFLOVAK drum dryers. New developments and refinements, that are exclusive and patented BUFLOVAK features, bring the economies and advantages of drum drying to a constantly growing list of products.

To meet successfully these widely differing requirements, BUFLOVAK Dryers are built for vacuum and atmospheric operation; in single, double drum, twin drum and multiple stage types. The standard sizes meet practically all capacity requirements.

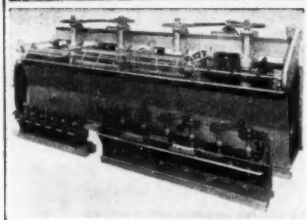
EVACTOR

STEAM JET VACUUM PUMPS

Croll-Reynolds Steam Jet Evactors are made in single, two, three, four, and five stage units for any vacuum up to a few microns absolute. More than 10,000 installations are serving all types of condensers and chemical processing units. There are no moving parts which means extreme simplicity and dependability. Constant research and development by an organization which has specialized on this equipment for over thirty years has also provided exceptional efficiency.

CHILLED WATER FOR PROCESS COOLING



Croll-Reynolds Chill-Vactor equipment uses the Evactors described above to chill water and aqueous solutions by evaporative cooling. The total capacity of Chill-Vactors installed to date is equal to over 30,000 tons of ice per day. This equipment is furnishing chilled water for air conditioning, chilled liquors for chemical process work and for chilling porous solids and wetted surfaces.

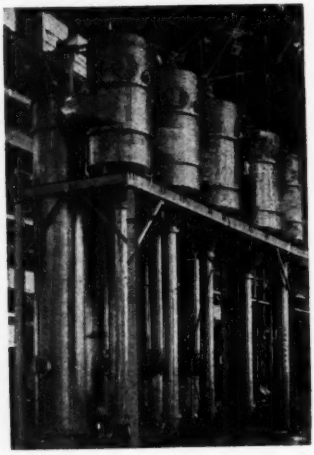
BUFLOVAK
Modern
PROCESSING EQUIPMENT



Listed here are some of the many standard and special types of BUFLOVAK, BUFLOKAST, and BUFLOWELD equipment. Obviously, a line so extensive in type and application cannot be fully described here. However, bulletins completely describing the individual pieces of equipment are available upon request.

ACID EGGS • AUTOCLAVES • BREWHOUSE EQUIPMENT • CAUSTIC POTS • CHEMICAL CASTINGS • CONDENSERS • DISTILLATION APPARATUS • DRYERS • EVAPORATORS • FATTY ACID STILLS • IMPREGNATORS • KETTLES • NITRATORS • NITRIC ACID RETORTS • PILOT PLANT EQUIPMENT • REDUCERS • SOLVENT RECOVERY APPARATUS • SULPHONATORS • VULCANIZERS • DOPP KETTLES

BUFLOVAK maintains a Research and Testing Plant to assist customers in the solution of processing problems and to develop more efficient production methods and improved finished products. These facilities can save you time and money. Results are definite. Take advantage of these facilities and a highly specialized and experienced technical staff.

BUFLOVAK EVAPORATORS

FOR THE RECOVERY OF SOLIDS . . .

BUFLOVAK Vertical Rapid Concentration Evaporators are simple in design and construction and provide maximum recovery of solids. A high rate of evaporation per square foot of heating surface results from improved heat transfer, accomplished by proper steam distribution, correct velocity of steam and thorough removal of non-condensable gases and condensate.

FOR CHEMICAL PROCESSES . . .

BUFLOVAK Evaporators are designed and built for every chemical process requiring evaporation. They offer operating economies and efficient, dependable, long-life performance. They can be built of any material of construction suited to the particular application.

FOR SOLVENT RECOVERY . . .

In the manufacture of medicinal and drug extracts and in the extraction of active principles from vegetables or animal products, a dilute solution is obtained which requires concentration under conditions of maximum solvent recovery and minimum entrainment loss. BUFLOVAK provides these advantages in evaporators designed for economical construction in stainless steel, aluminum, nickel, etc.

FOR FOOD PRODUCTS . . .

BUFLOVAK Evaporators of stainless steel profitably meet the exacting requirements of producing concentrated food products of high quality. They are built in sizes and types to meet every operating condition, including multiple effects and save 50% and upward in steam and cooling water.

FOR LOW-TEMPERATURE OPERATION . . .

BUFLOVAK Low-Temperature Evaporators can be furnished to operate as low as 58° F. to safely concentrate delicate food and chemical products. Automatic controls simplify operation, reduce labor to a minimum, and give uniform results even to the density of the product.

DURCO

ACID RESISTING
HEAT EXCHANGER

The Duriron No. 4A Heat Exchanger (shown) is highly resistant to practically all commercial corrosives. It is designed to permit counter or parallel flow and either vertical or horizontal arrangement of units.

Other Exchangers of Durimet 20, Monel, Nickel or Steel.

TO MAKE DIFFICULT EXTRACTIONS EASY

Make your laboratory, pilot plant or plant-size liquid extraction process easier, more economical, with York-Scheibel Extractors. This practical, highly efficient, equipment is designed for effecting separations where distillation cannot be conveniently or economically employed, as in:

- Close-boiling mixtures
- Azeotropic mixtures
- Heat-sensitive mixtures
- Non-volatile mixtures
- Impurities and color bodies
- Materials from dilute solutions
- Structural isomers

High throughput capacity and high efficiency without limit to the number of stages, low stage height, low maintenance cost and low initial cost are features no other equipment for performing similar separations can claim.

FREE BULLETIN

Our Bulletin 12, contains equipment description and applications for all users of solvent extraction operations.

Three Aces Together on a Great

CHEMICAL FEED TEAM!

THE NEPTUNE COMPLETE CHEMICAL FEED UNIT

A competent trio of the tank, the agitator, and the pump are now a smooth-working team in the *Neptune Complete Chemical Feed Unit.*

Here is the long-sought industrial aid that is ready to plug-in, pipe-in, and then serve *finer feeding controls* on all assignments where chemical apportioning is required.

The easy-working simplicity of the Neptune Chemical Apportioning Pump eliminates costly servicing and production delays.

This Neptune Unit is adaptable to many individual types of operating systems, using automatic start and stop, timing, flow meters, etc. Pressures up to 1000 pounds. It is a unit that can be used for various processes. All parts are readily interchangeable. You have a choice of the "O" Ring or chevron-type packing. Immediate delivery of standard pumps is assured from stock throughout the country.

NEPTUNE PUMP Manufacturing Co.

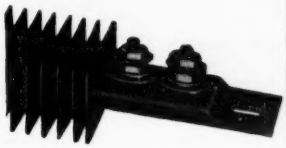
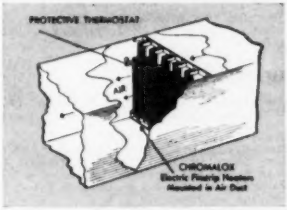
CHROMALOX offers you efficient and economical *Packaged Electric Heat*—to fit your specific needs

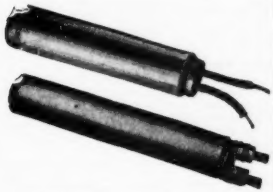


CHROMALOX Electric Heaters give dependable "on-the-spot" heat where and when heat is needed. They produce uniform and accurate temperatures with automatic or manual control. Low initial cost, low installation cost and low operating costs are among the other advantages they give you.

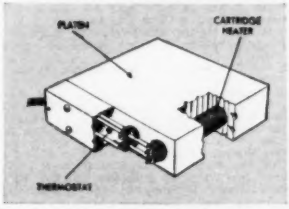
CHROMALOX STRIP HEATERS



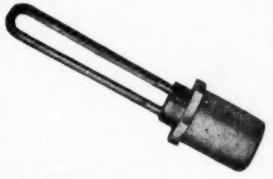
Easy-to-install CHROMALOX Strip Heaters are clamped to flat or curved surfaces, round vats, pipes and tubes. They are made in straight lengths, rings and segments . . . and may be curved or bent to fit cylindrical or "dished" surfaces. Typical applications include: armatures, cleaning tanks, molds, process kettles, plating baths, revolving rolls, etc.



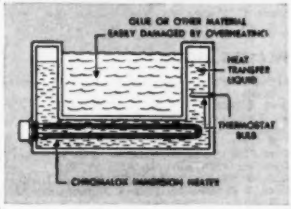
CHROMALOX FINSTRIP HEATERS



Finstrip Heaters are used for drying, curing, space heating and other applications requiring heated air under forced circulation. Air and gases are quickly and easily heated; uniform operating temperatures up to 750°F. are accurately maintained by thermostatic control. Finstrips, designed for minimum turbulence, are well suited for use in air-ducts.

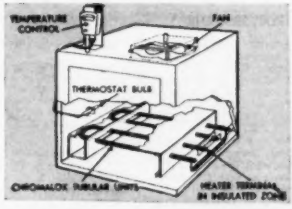


CHROMALOX CARTRIDGE HEATERS



Compact CHROMALOX Cartridge Heaters are ideal for use when concentrated heat is needed. Inserted into close-fitting holes, they provide easily controlled heat for dies, molds, platens, etc. They are quickly and easily installed in stationary or moving parts with minimum labor and material costs; they may be controlled for accurate, dependable, care-free operation.

CHROMALOX IMMERSION HEATERS



CHROMALOX Immersion Heaters are used in degreasing, cleaning, pickling and plating baths; for melting greases, asphalts and similar viscous fluids; for heating Dowtherm, Arochlor, Prestone, and other heat-transfer mediums. Available in many sizes and types, with alloy sheaths to resist corrosive action.

CHROMALOX TUBULAR HEATERS

These heaters, in straight or tailored shapes are used for convection, conduction and radiant heating. They may be clamped to metal surfaces, used in ovens, or immersed in greases. They are especially useful to heat ovens, calenders, molding-presses and similar equipment utilizing heat.

CHROMALOX NATION-WIDE ENGINEERING SERVICE AVAILABLE

Technical know-how for solving thousands of heating problems is available to you without obligation. Chromalox Application Engineers, located in principal cities, will work with you in adapting electric heat to your product or process. Write for name of Chromalox Engineer nearest you.

Greater Unit Capacity with BUFLOVAK-DOPP Processing Kettles

For the profitable and better processing of many Chemical, Food, Pharmaceutical and Grease Products.

Available in many types, materials of construction, and sizes, to meet specific requirements.

Designed to perform the important function of thorough mixing with the minimum power consumption, BUFLOVAK-DOPP Kettles process a better, more uniform product, at lower production cost.

Heating surfaces can be kept continuously free from accumulated material by special scraping agitators.

Safe, quiet, and dependable operation is insured by completely enclosed drive units equipped with roller bearings. Cut bevel gears operate in bath of oil.

Greater unit capacity . . . an increase in heat transfer . . . substantial savings in power . . . thorough mixing . . . and the complete discharge of processed batches, are benefits resulting from exclusive features in the design and construction of BUFLOVAK-DOPP Kettles.

The BUFLOVAK Research and Testing Laboratory is equipped to process a small quantity of your material to determine the type equipment and accessories that will give you the most efficient results. Write for complete information.

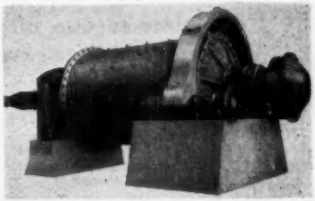
EQUIPMENT TO LOWER YOUR PRODUCTION COSTS

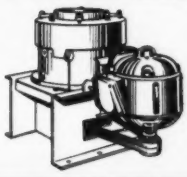


MARCY OPEN-END MILLS

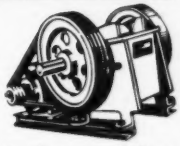
Marcy ball, rod and tube mills have greater grinding capacity than conventional mills, with a lower per-ton cost, because of the Marcy Low Pulp Line. The open-end discharge removes finished sands without wasteful overgrinding, increasing useful grinding capacity with better product uniformity.

Marcy ball mills, in closed circuit grinding, will deliver a product of 200 mesh and finer, or coarser if desired. Available in a variety of drives with capacities ranging from 5 to 2500 tons per day. Laboratory sizes available.

Marcy rod mills will produce a 20-mesh product (or coarser, as desired) in one pass from a 1-inch feed, or finer products when working in closed circuit. Can be furnished in capacities up to 6000 tons of 1-inch feed of average ore reduced to 20-mesh.

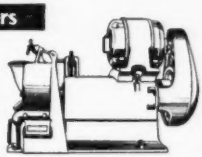


Genuine Wilfley Concentrating Tables



The Wilfley Table will give more exact separation of products, increased recovery, and a greater capacity at a lower cost of operation and upkeep than comparable equipment. It is mechanically operated and consists of a self-oiling, enclosed head motion operating an endwise reciprocating table with a rubber or linoleum covered deck surface properly riffled. The Wilfley Table is capable of dressing any ore or material subject to gravity concentration. Available in a complete range of sizes up to 180 tons capacity per 24 hours. Laboratory sizes also available.

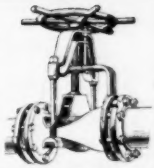
Massco Gy-Roll Reduction Laboratory Crushers



Reduces ½" feed to as fine as 10 mesh in a single pass. Very high capacity and low power consumption; replaces bulky, unhandy equipment such as rolls and coffee mill. Two sizes available, 6" and 10"

Improved Massco Laboratory Crushers

Most crushers crush faster than they can discharge. This one gets rid of the rock in a hurry. Two blows every revolution mean minimum oversize. Plate wear taken up by front adjustment through convenient hand wheel. Smooth jaws insure better product and easier cleaning. No shims, set-screws or toggles. Welded plate frame; manganese steel jaw and cheek plates; bronze bushed bearings; Lincoln grease fittings. Strong and compact but relatively light.



Massco-McCool Pulverizers

The Massco-McCool Pulverizer is a disc-type grinder designed for pulverizing to any mesh, in one operation, virtually any material. Ideal for the assay, metallurgical, chemical and industrial laboratory. The planetary movement of the rotating disc assures long life to the grinding surfaces. This machine will grind to 150 mesh at one pass—and more samples per hour at lower cost. No gears; oil lubricated; 100% anti-friction bearings.

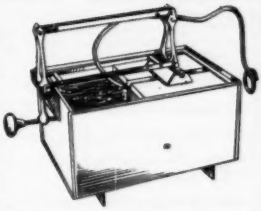
Massco-Grigsby Rubber Pinch Valves



Wherever abrasive or corrosive pulps or liquids must be moved, these valves are finding wide use. Useful in ore milling, cement plants, dredging, and many industrial operations where severe wear makes frequent replacement of metal type valves necessary and costly. With certain modifications, these valves are adaptable in chemical plants for handling highly corrosive solutions, solutions which crystallize at normal temperatures, oily liquids, and fine dry materials. Shuts tight, through patented sleeve design, even on solid particles. No packing glands. Freezing does not deteriorate sleeve. Easy to operate. Sizes—1" and 2" for continuous pressure to 100 lbs., 3", 4", 6", 8", 10" and 12", to 150 lbs. State your application.

Massco-Adams Density Controllers

This pulp density control eliminates both the frequent checking of classifier density and manual regulation of water by the attendant. Water dilution is regulated to maintain percentage of solids within close limits of any predetermined point. Thus, size of finished product is controlled. Results in maximum efficiency in classification and grinding at optimum capacity. In any closed circuit grinding, results depend upon pulp density in the classifier. The Massco-Adams Density Controller regulates density automatically and continuously.

Massco-Adams Reagent Feeders

A portable independent unit for permanent or temporary service, quickly placed in operation at any work height. Economical; requires no electrical connections, has no moving parts, only one micrometer screw adjustment. Adaptable to most types of wet reagents and liquids, easily cleaned, trouble-free. Accurate within one percent, with adjustable feed rate. Operates on siphon principle, avoids oxidation or reprecipitation of reagent due to agitation.

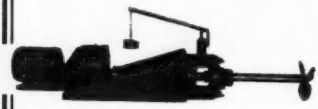
Lightnin® Mixers

(MIXCO® Engineered)

Complete service on fluid agitation needs



PORTABLE

More than 30 models, from ⅛ to 3 HP. Electric and air motor types. Direct drive and gear drive mixers for every application. Fully described in *Catalog B-75.*

TOP OR BOTTOM ENTERING

Propeller, paddle and turbine types. Sizes 1 to 500 HP. Included are new Series E Lightnin Mixers with up to 16 interchangeable speeds in standard gear reducer. For details, request *Catalog B-100* (complete line); *Catalog B-78* (propeller types only); *Catalog B-89* (paddle and turbine types).

SIDE ENTERING

For tanks to 5 million gallons capacity. Sizes 1 to 25 HP. Gear drive; V-belt drive; motorless types. Request *Catalog B-76.*

LABORATORY MIXERS

Precision built Lightnin Mixers for laboratories and small-batch production. Electric or air driven. Request *Bulletin DH-50.*

Lightnin Mixer advantages

All-standard construction—low upkeep

Easy conversion if process changes

Widest selection of impellers, mountings, materials

Scale-up results fully predictable

Efficient sizing in modern laboratory and pilot plant facilities

Delivered complete, ready to operate

Correct performance guaranteed—or purchase price refunded

SIGMAMOTOR . . . PUMPS

LIQUIDS, SOLUTIONS & GASES
through tubing . . . QUICKLY, EASILY
NO CORROSION . . . NO CONTAMINATION

An adaptable and inexpensive laboratory aid in moving fluids, the SIGMAMOTOR operates through the pressure of "fingers" on flexible tubing. No corrosion of metal parts, no contamination, no valves to clog. Its operation is not affected by solids in solution. Quick adjustment may be made from one size tubing to another. Flow rates range from 1½ to 30 gallons per hour without speed changes. SIGMAMOTOR opprates effectively at speeds from 0 to 500 RPMs. Ideal for the chemical laboratory or the process engineer. Write today for full details.

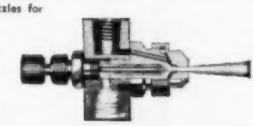
Engineered Spray Nozzles

All nozzles engineered for high operating efficiency with minimum possible maintenance and replacement. Manufactured with special modern high-speed machine tools for lower cost.

Nozzles of Every Type For Every Application

Spraying Systems Co. specializes in the design and manufacture of spray nozzles. Types and sizes for chemical industry application number in the thousands. Every known type of spray can be produced to meet your exact specifications in spray pattern, spray angle, degree of atomization, and volume for any given pressure. Nozzles are supplied in wide variety of materials to meet all conditions. Also supplied are such accessory units as line strainers, adjustable nozzle joints and valves.

Nozzles Engineering Service



We invite your inquiry regarding any specialized nozzle application. Our engineering department will assist you in the proper selection of nozzles for your particular needs.

For PULVERIZING and DUST COLLECTION Applications

THE MIKRO-PULVERIZER—a dustless Pulverizer for dry or wet milling, granulating, blending—no fans, cyclones or separators. Recent developments make it even more efficient in handling of heat-sensitive materials.

THE MIKRO-ATOMIZER—a mechanical screenless Pulverizer for the efficient production of ultra-fine powders from 1 to 25 micron and at remarkably low grinding temperatures.

SEND FOR NEW Illustrated Bulletins.

1450

THE MIKRO-COLLECTOR*—a radically different system of dust collection employing unique principles that insure optimum dust recovery (up to 99.999%) and phenomenal filter rates—for general air clarification and saving material thru adequate dust control.

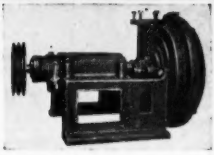
For pumping acids, caustics, slurries, viscous liquids, *specify...*

JABSCO
Corrosion Resistant
PUMPS

Patented and Pats. Pend.



SELF PRIMING. Obtains vacuum in excess of 26".
VERSATILE. Handles variety of liquids and slurries at wide range of speeds.
SAFE. Self-priming feature permits cleaner, safer, more accessible installations.
SIMPLE. Easily and quickly disassembled for cleaning.
TROUBLE FREE. Impeller lubricated by liquid pumped. No oil or grease cups. No packing. No metal to metal contact of moving parts.
MORE CAPACITY for its size and price than any other type of pump. Capacities up to 56 GPM. Pressures up to 35 PSI.
FLEXIBLE IMPELLER. Odorless, tasteless, non-toxic corrosion resistant neoprene—also gum rubber if specified.

Stainless Steel Models available in ⅜", 1" and 1½" port sizes.
Bronze Models available in ¼" up to 1¼" port sizes.
Cast Iron Models available in 1", 1¼" port sizes.

DENVER SRL RUBBER LINED PUMPS

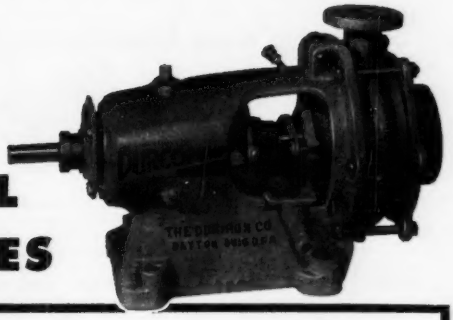
Denver SRL Pumps
Sizes: **2" x 2" to 10" x 8"**

Low Horsepower: **High efficiency results in lowest HP requirements.**

Low Cost Operation: **Long life of wearing parts cuts operating costs. Fewer shutdowns.**

Rubber Parts: **All parts coming in contact with pulp are rubber covered.**

Abrasives: **Ideal for pumping abrasives, caustics or corrosive pulps.**



Simplicity: **Very simple construction. Only ½ normal number of parts.**

Heads: **Heads up to 100 feet.**

Ask for Bulletin No. P9-B6.

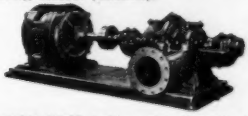
A-C Centrifugal Pumps

MORE THAN 60 YEARS of experience in designing and building centrifugal pumps goes to work for you when you specify Allis-Chalmers.

In addition, A-C maintains one of the most modern pump test floors in the industry, with the latest electronic and hydraulic testing devices. Contact Allis-Chalmers for more information, or write for Bulletin 52B6059, "Handy Guide for Selecting Centrifugal Pumps." A-3502



PROCESS—For corrosive and abrasive liquids, particularly corrosive liquids with abrasives in suspension. New *Equiseal* stuffing box eliminates leakage. Capacities to 1300 gpm, heads to 275 ft. Bulletin 08B6615.

CHEMICAL — Designed and built especially to meet problems of temperature, corrosion and contamination. Available in many materials and with several types of sealing arrangements. Capacities to 1200 gpm, heads to 250 ft, temperatures to 500 F. Bulletin 5287638.

SOLIDS — Made of special alloys to resist corrosion and abrasion. Handles up to 40% solids in suspension. Few working parts, easily accesible. Capacities 175 to 10,000 gpm, heads to 270 ft. Bulletins 0887112 (corrosives), 0886381 (abrasives).

SINGLE STAGE double suction. Capacities to 7000 gpm, heads to 475 ft; large high-head to 40,000 gpm, heads to 200 ft; large low-head to 170,000 gpm. For water supply, circulating and drainage. Bulletin 0886146.

ELECTRIFUGAL — The only close-coupled pump with pump and motor mounted in "unitcast" frame and operating on single shaft. Alignment is perfect and permanent. Easy to install. Capacities 10 to 500 gpm, heads to 220 ft. Bulletin 5286140.

Equiseal and *Electrifugal* are Allis-Chalmers trademarks.

R & M MOYNOS PUMP "ANYTHING"

No Pistons • No Valves • Reversible

Moyno "progressing-cavity" action self-primes with nearly perfect vacuum; delivers positive pressures to 1000 p.s.i. without pulsation or high turbulence.

NO OTHER PUMP LIKE THIS

Bearings are completely isolated from pumping compartment. No portion of housing is used as sealing surface. Easily cleaned. Thousands already in use.

CHEMICALS, ABRASIVES, HIGHLY VISCOUS FLUIDS, SOLIDS IN SUSPENSION — *everything that can be pushed through a pipe!*

RIGHT FOR YOUR WORK

Types, sizes, and materials specifications for all purposes. Sold coast to coast. Write for Bulletin No. 30-B.G.

BEACH-RUSS HIGH VACUUM PUMPS

Rotary — Positive Vacuum to 10 Microns Capacities, 1 to 850 c.f.m. For dry or wet vacuum

Exclusive design embodies automatic air-oil and water-oil separator and lubrication system. Oil-sealed action, slow pump speed yet high-speed evacuation, trouble-free service. Also air compressors and gas boosters.

BEACH-RUSS COMPANY
44 CHURCH STREET • NEW YORK 7, N. Y.

Pfaudler

GLASS-LINED AND ALLOY PROCESS UNITS

To meet your most exacting requirements, there are over 90 glass-lined and alloy reactors in the standard Pfaudler line. Capacities range from 2 gallons up. They are available with stuffing boxes for either average or high pressure work. Adjustable baffles provide a wide range of agitation flexibility. Impeller speed can be readily changed by simple adjustment.

In glass-lined vessels, the Pfaudler glass is resistant to more corrosive substances than almost any other construction material, and Pfaudler Technical Service Engineers are always ready to lend a hand with your reaction problems. For full details, write:

ENTRAINMENT SEPARATORS and MIST EXTRACTORS

GIVE EFFICIENCY and ECONOMY to Your Equipment

Improved overhead product quality; elimination of product entrainment loss; and increased production, through allowing use of greater vapor velocities, are inherent characteristics of York technically-knitted wire-mesh separators for use in all processing equipment where both liquid and gas phases are present.

FREE BULLETIN

Our new Bulletin 13 gives an insight into the remarkable savings possible by proper entrainment separation.

DURCO

corrosion resisting valves for flow control in practically all services. Plug valves, Y valves, angle valves, diaphragm valves, and check valves in alloys to handle practically all corrosive solutions.

Non-lubricated Type F plug valve (shown) is outstanding development in flow control. Designed specifically for heavy chemical service; has been tested and proved in hundreds of applications. Write for free descriptive literature.

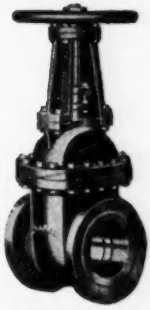
CHAPMAN VALVES

for All New Chemical Processes

(B) 900 lb. Solid-Wedge Steel Gate Valve. A.S.A. and A.P.I. Ratings.

(A) Non-Slam Tilting-Disc Steel Check Valve prevents head-loss and damage to pipe lines.

(C) List 960 Forged Steel Small Gate Valve (¼" to 2") with super-hardened seat and wedge.



150-lb. Solid Wedge Steel e Valve A.S.A. and A.P.I. ings.

In the development of all today's widely used chemical processes . . . including production of synthetic rubbers . . . Chapman has been one of the chief reliances of the industry in meeting new requirements for valves. Shown here are a few Chapman Valves, developed for special requirements, which are now included in Chapman's standard line.

Through many years of experience, chemical researchists have learned that Chapman's laboratory technicians, designers, and field engineers can always be counted on for 100% co-operation . . . that Chapman has invaluable facilities for producing special alloy steels . . . and that Chapman's solid grounding of practical experience in pioneering new processes is a powerful aid to progress.

Are *you* taking full advantage of Chapman co-operation and "know-how"? If not, let's talk it over, and see how we can help.

(E) List 106 Iron Body Double-Disc Gate Valve, rated 800 lb. pressure.

EVACTOR

STEAM JET VACUUM PUMPS

Croll-Reynolds Steam Jet Evactors are made in single, two, three, four, and five stage units for any vacuum up to a few microns absolute. More than 10,000 installations are serving all types of condensers and chemical processing units. There are no moving parts which means extreme simplicity and dependability. Constant research and development by an organization which has specialized on this equipment for over thirty years has also provided exceptional efficiency.

CHILLED WATER FOR PROCESS COOLING

Croll-Reynolds Chill-Vactor equipment uses the Evactors described above to chill water and aqueous solutions by evaporative cooling. The total capacity of Chill-Vactors installed to date is equal to over 30,000 tons of ice per day. This equipment is furnishing chilled water for air conditioning, chilled liquors for chemical process work and for chilling porous solids and wetted surfaces.

as the MAN-POWER SHORTAGE becomes more acute

You may be facing the problem of finding enough engineers or highly technical men to keep your production up to the new demands growing out of the defense effort.

As these defense orders accelerate—so will civilian orders decelerate because of shortages of material, etc. This is certain to release engineers, plant operating men and technicians.

These men follow with intense interest the publication devoted to their particular field. And so they are gathered into convenient groups whenever you wish to reach them — as readers of America's industrial publications.

Let us help you select the proper publications in order to reach just the type of technical men you need.

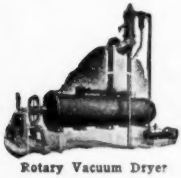
Atmospheric Drum Dryer

THE KEY TO SAVING TIME AND MONEY
CONSOLIDATED



Dry Powder Mixer

Hydraulic Press

WE BUY AND SELL GOOD USED MACHINERY SINGLE ITEMS TO COMPLETE PLANTS

More than 30 years of service has established "CONSOLIDATED" not only as a reliable source of supply for dependably high grade Used Machinery, but as a center for quick disposal of idle machinery for cash. If you have capital tied up in a single item or a complete plant, "CONSOLIDATED" has the resources to pay you quick cash for such usable equipment.

Rotary Vacuum Dryer

WE LOCATE AND GET YOU THE MACHINERY YOU NEED

Many times you need certain machinery not readily available. So wide are "CONSOLIDATED" contacts that we can frequently locate the machinery you want and by supplying it quickly, save you weeks or months of your production time. Many "case histories" may be cited to prove how "CONSOLIDATED" can help you as we have helped so many other plant operators.

Rotary Vacuum Drum Dryer

WE LIQUIDATE INDUSTRIAL PLANTS QUICKLY

"CONSOLIDATED," by long experience and training, knows exactly how to handle the many details of industrial plant LIQUIDATION efficiently, rapidly and effectively, so that you realize maximum value from the sale. Many outstanding LIQUIDATIONS of noted industrial plants have been made by "CONSOLIDATED" recently and during the past years.

W. & P. Mixer

WE APPRAISE, REORGANIZE, FINANCE

"CONSOLIDATED" experience guarantees an expert appraisal of value for profitable sales. On the other hand, if it is desirable to keep a plant in operation, "CONSOLIDATED" will undertake its reorganization or financing and, judging by our past experience, assure the most successful results. Whatever your machinery problems, call a "CONSOLIDATED" representative for prompt action.

things happen fast in the . . .

Chemical Process Industries

. . . like synthetic detergents, anti-histamines, and cold rubber . . . like value of production, tripled in less than a decade. And in America's fastest-growing industry profit-minded executives watch CHEMICAL WEEK . . . to keep them abreast of the swift moving trends and developments which affect business interests. In the process industries, CHEMICAL WEEK is *management's own magazine.*

Every chemical businessman will profit by a personal subscription. Prices are $5.00 a year and $8.00 for two years.

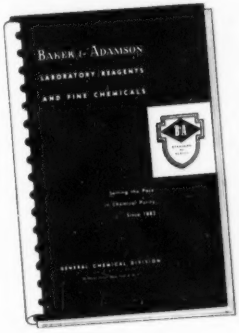
Principal General Chemical Products for major industries are listed in special advertisements appearing throughout the Chemicals and Raw Materials Section of this catalog.

Do You Have These Buyers Guides To GENERAL CHEMICAL PRODUCTS?

HEAVY, FINE and REAGENT CHEMICALS



★ For buyers and users of heavy and other industrial chemicals—and for those directing their use in research and manufacturing.

Every qualified buyer or user of Heavy, Fine and Reagent Chemicals should have these invaluable books on his desk. They are available on request at the nearest General Chemical office listed in the Directory Section of this catalog. Please use business letterhead when writing.

GENERAL CHEMICAL PRODUCTS BOOK

176 pages packed with facts and figures on General Chemical Acids, Alums, Sodium Compounds, Phosphates, Fluorine Derivatives, other industrial chemicals. Gives data on their physical properties, uses, packaging, shipping regulations, etc. Includes extensive 65-page reference section of tables, charts and factors, also comprehensive information on handling and storing major industrial chemicals.

★ For Production Requiring Quality Chemicals

★ For Industrial, Research and Educational Laboratories

★ For Process Planning and Development

BAKER & ADAMSON CATALOG OF REAGENTS AND FINE CHEMICALS

264 pages of clear, concise data on over 1,000 B&A Laboratory Reagents and Fine Chemicals—including grades, strengths, maximum limits of impurities, etc. Contains special sections on packaging, also on storage and handling of Reagents requiring extra precautions.

TRADE MARK

ALKALIS

CAUSTIC POTASH
45% Liquid Flake and Solid
CAUSTIC SODA
Liquid 50% Standard and Rayon Grades
Liquid 70-73% Standard Grade
Flake and Solid, 76% Na_2O
CRUDE SODIUM SESQUICARBONATE
NATURAL SODA ASH
Light and Dense
PHOSPHATED CAUSTIC SODA
(See also, Specialty Products List)

SOLVENTS

CARBON BISULFIDE
CARBON TETRACHLORIDE
Technical and C.P.
(See also, Specialty Products List)
ETHYLENE DIBROMIDE
SULFUR MONOCHLORIDE

PHOSPHATES

ACID SODIUM PYROPHOSPHATE (ASPP)
Food§ and Technical Grades
(See also, Specialty Products List)
CHLORINATED PHOSPHATE
(See also, Specialty Products List)
DIPOTASSIUM PHOSPHATE (DKP)
DISODIUM PHOSPHATE (DSP)
Food and Commercial Grades
MONOPOTASSIUM PHOSPHATE (MKP)
MONOSODIUM PHOSPHATE (MSP)
POTASSIUM PHOSPHATE LIQUOR
SODIUM TRIPOLYPHOSPHATE (STPP)‡
TETRAPOTASSIUM PYROPHOSPHATE (TKPP)‡
TETRASODIUM PYROPHOSPHATE (TSPP)‡
Anhydrous and Crystals
TRIPOTASSIUM PHOSPHATE (TKP)

MAGNESIAS

Westvaco produces a wide variety of Magnesias from both seawater and mined Magnesites. Extreme flexibility of plant facilities allows the production of "custom-built" Magnesias suited to new applications. The more important standard types of Magnesia in regular production are listed below:

ADSORPTIVE GRADE
Powdered and Granular, various activities
AGRICULTURAL GRADE
CHEMICAL GRADE
CHLORIDE FREE GRADE
INSULATION GRADE
OXYCHLORIDE CEMENT GRADE
REFRACTORY GRADE— Periclase
RUBBER GRADE— Heavy

OTHER MAGNESIUM CHEMICALS

MAGNESITE— Crude Mined
MAGNESIUM CHLORIDE— Liquid and Flake
MAGNESIUM SILICATE‡— Adsorptive (Magnesol*)
(See also, Specialty Products List)

BARIUM CHEMICALS

BARITES, GROUND
BARIUM CARBONATE*
BARIUM HYDROXIDE— Octahydrate, Technical Grade, Flake and Crystal Glass Grade, Crystal
BARIUM HYDROXIDE— Pentahydrate, Flake
BARIUM NITRATE
BARIUM OXIDE
BARIUM PEROXIDE
BARIUM SULFIDE*— (Black Ash)
BLANC FIXE— (Barium Sulfate) Powder and Paste

SPECIALTY PRODUCTS

ALUMINA HYDRATE 50
(Basic Aluminum Sulfate)—A white dry powder which is transparent when milled with lithographic varnishes and paint vehicles.
ALUMINA HYDRATE P
(Basic Aluminum Phosphate)—A white, dry powder similar to Alumina Hydrate 50
ALUMINA HYDRATE PASTE
A water suspension of Alumina Hydrate 50
DRY MIXTURES
Mixtures, formulated to order containing phosphates, alkalis, detergents, etc.
FIRE EXTINGUISHER FLUID
Carbon Tetrachloride Base (See Solvents)
FOSKLOR*—**BACTERICIDE, GERMICIDE, DISINFECTANT, DEODORANT**
A white dry powder which is used as a water solution. The active agent is sodium hypochlorite (See Phosphates)
HEPTANE, NORMAL, ASTM Certified
Meets ASTM requirements
For use as a primary reference fuel
KAM*—**BOTTLE WASHING COMPOUND**
Phosphated Caustic Soda (See Alkalis)
LEAVENING AGENTS AND FORMULATIONS§
Baking powders and creams based upon acid sodium pyrophosphate
MAGNESOL*‡—ADSORPTIVE POWDER
An activated hydrated magnesium silicate, in the form of a fluffy, white free-flowing powder—strongly adsorptive toward a variety of substances.
DRY CLEANING GRADE
PETROLEUM GRADE
INDUSTRIAL GRADE

OTHER CHEMICALS

ALUMINUM BROMIDE‡— Anhydrous
BROMINE— Liquid
CHLORAL‡— Technical
CHLORINE— Liquid
FERROPHOSPHORUS
GYPSUM— Cement, Agricultural and Chemical Grades
HYDROBROMIC ACID, 48%
HYDROGEN BROMIDE‡— Anhydrous
HYDROGEN PEROXIDE
PHOSPHATE SLAG
SODIUM POLYSULFIDE
SODIUM SULFIDE, 60-62%— Flake and Solid Grades
STRONTIUM HYDROXIDE
Octahydrate, Technical Grade Crystal

AGRICULTURAL CHEMICALS

†**DEVEX 'T'***‡: DDT Technical
†**DEVEX D-50***‡— DDT Dry Dust, 50%
†**DEVEX W-50***‡— DDT Wettable Dust, 50%
FOSVEX*— Tetraethyl Pyrophosphate, 40%
WESTVACO GRAIN FUMIGANTS‡:
Composition shown by volume:
No. 3—80% Carbon Tetrachloride, 20% Carbon Bisulfide
No. 4—25% Carbon Tetrachloride, 75% Ethylene Dichloride
No. 5—(Fur Fumigant No. 5)—50% Carbon Tetrachloride, 50% Ethylene Dichloride
No. 6—(Spot Fumigant No. 6)—60% Carbon Tetrachloride, 25% Ethylene Dichloride, 15% Ethylene Dibromide
No. 8—65% Carbon Tetrachloride, 30% Ethylene Dichloride, 5% Ethylene Dibromide
No. 9—80.2% Carbon Tetrachloride, 15.1% Carbon Bisulfide, 4.7% Ethylene Dibromide
METHYL BROMIDE
Shipped in cylinders and cans under pressure as a liquid—for fumigation of nurseries, greenhouses, warehouses, flour mills, railroad cars, and similar structures.
SOILFUME 60-40*‡— 42% Ethylene Dibromide, by wgt.
SOILFUME 80-20*‡— 23% Ethylene Dibromide, by wgt.
SOILFUME 85**‡— 83% Ethylene Dibromide, by wgt.
†**TRIVEX 'T'***‡— Benzene Hexachloride, Technical
†**TRIVEX G-9***‡— Benzene Hexachloride Dry Dust, 9% Gamma Isomer
†**TRIVEX W-50***‡— Benzene Hexachloride Wettable Dust, 6% Gamma Isomer
